Help Get Rid Of The Radioactive Wastes From St. Louis' MISSOURI RIVER FLOODPLAIN

We, the undersigned citizens of metro St. Louis, care about the safety of the Missouri and Mississippi rivers — the **source of the water we drink**. The radioactive wastes must be removed from West Lake Landfill — from St. Louis' MISSOURI RIVER FLOODPLAIN!!

These radioactive wastes were generated from 1942 to 1958 in St. Louis during the production of the world's first atomic bombs. One of the isotopes, uranium-238, will continue to give off radioactive particles and rays literally for billions of years. Any exposure to radiation increases the risk of cancer and other life-shortening diseases.

We urge Congress to transfer responsibility to the **U.S. ARMY CORPS OF ENGINEERS** for the removal of these wastes from the West Lake Landfill.
